

Ward 4B — Final Same-Morning Tightening

Controlled revision notice DW-2025-10/R3-FINAL

FINAL SAME-MORNING ROUND 3

Issuer: Patient Flow Command | Issued: Monday 3 March 2025, 07:10

Applies to: DW-2025-10/R2 | Notice: DW-2025-10/R3-FINAL

Final precedence: This notice governs overlapping P04 and P09 details. Retain every effective Round 1 and Round 2 change not expressly replaced here.

Same-window tightening — P04 and P09

Field	P04 final requirement	P09 final requirement
Bedside assessment	Keep Fri 28 Feb; RN Case Manager A; 40%	Thu 27 Feb (was Mon 3 Mar); RN Case Manager B (was A); 40%
Medication reconciliation + DME	Keep Mon 3 Mar; Pharmacy Med-Rec Tech; 30%	Fri 28 Feb (was Tue 4 Mar); Pharmacy Med-Rec Tech; 30%
NEMT transport booking	Tue 4 Mar [09:00] (was Wed 5 Mar [09:00])	Tue 4 Mar [09:00] (was Thu 6 Mar [16:00])
Transport assignment	Transport Coordinator, 60% (replace 30%)	Transport Coordinator, 60% (replace 30%)
Handover	Wed 5 Mar (was Thu 6 Mar); Social Worker; 40%	Wed 5 Mar (was Fri 7 Mar); Home-Care Liaison; 40%
Transport→handover link	Strong finish-to-start, lag 0	Strong finish-to-start, lag 0

Conflict disposition

LEAVE THIS CONFLICT STANDING. P04 and P09 both require the single Transport Coordinator in the Tuesday 09:00 pickup window. Their two 60% assignments intentionally total 120%. Do not change either patient, time, owner, or load. The over-capacity state is the escalation item for the NEMT-vendor handoff call.

Final reconciliation

- The Round 2 P03, P07, and P10 pull-forwards and zero-lag handover links remain effective.
- The Round 1 P02 and P11 assessment dates remain effective, as does the Round 2 P07 RN reassignment.
- Exactly one resource may be over capacity: Transport Coordinator in the Tuesday 09:00 window. RN Case Managers A/B, Social Worker, Pharmacy Med-Rec Tech, and Home-Care Liaison must remain within capacity.
- All twelve current-cohort workstreams retain four tasks and a strong Assessment → Med-rec/DME → NEMT → Handover sequence.

Handoff status: final notice for shift review. Keep the complete revision live and uncommitted in the original loaded baseline. Do not save, save as, or export.

Command authorization: Priya Shah, MD — Patient Flow Command | 07:10
