SUMMARY OF FINDINGS

Total Branches in Sensitive Tracts: 4

Branches Rated "Needs to Improve": 2 (WI-BR-002, WI-BR-003)

Branches Rated "Satisfactory": 2 (WI-BR-001, WI-BR-004)

Branches Rated "Outstanding": 0

KEY CONCERN: Branch WI-BR-003 in tract 55079000100 presents the most significant

CRA performance deficiency. The combination of low small-business lending volume (40% of goal), minimal community outreach (2 of 6 target events), and its location in the highest-HMDA-concentration tract creates a compounding risk pattern that should be escalated to the Fair Lending Committee.

Recommendation: Immediate corrective action for WI-BR-002 and WI-BR-003.

WI-BR-003 findings should be cross-referenced with HMDA fair-lending review tract concentration analysis for tract 55079000100.
